

Intelligent dove

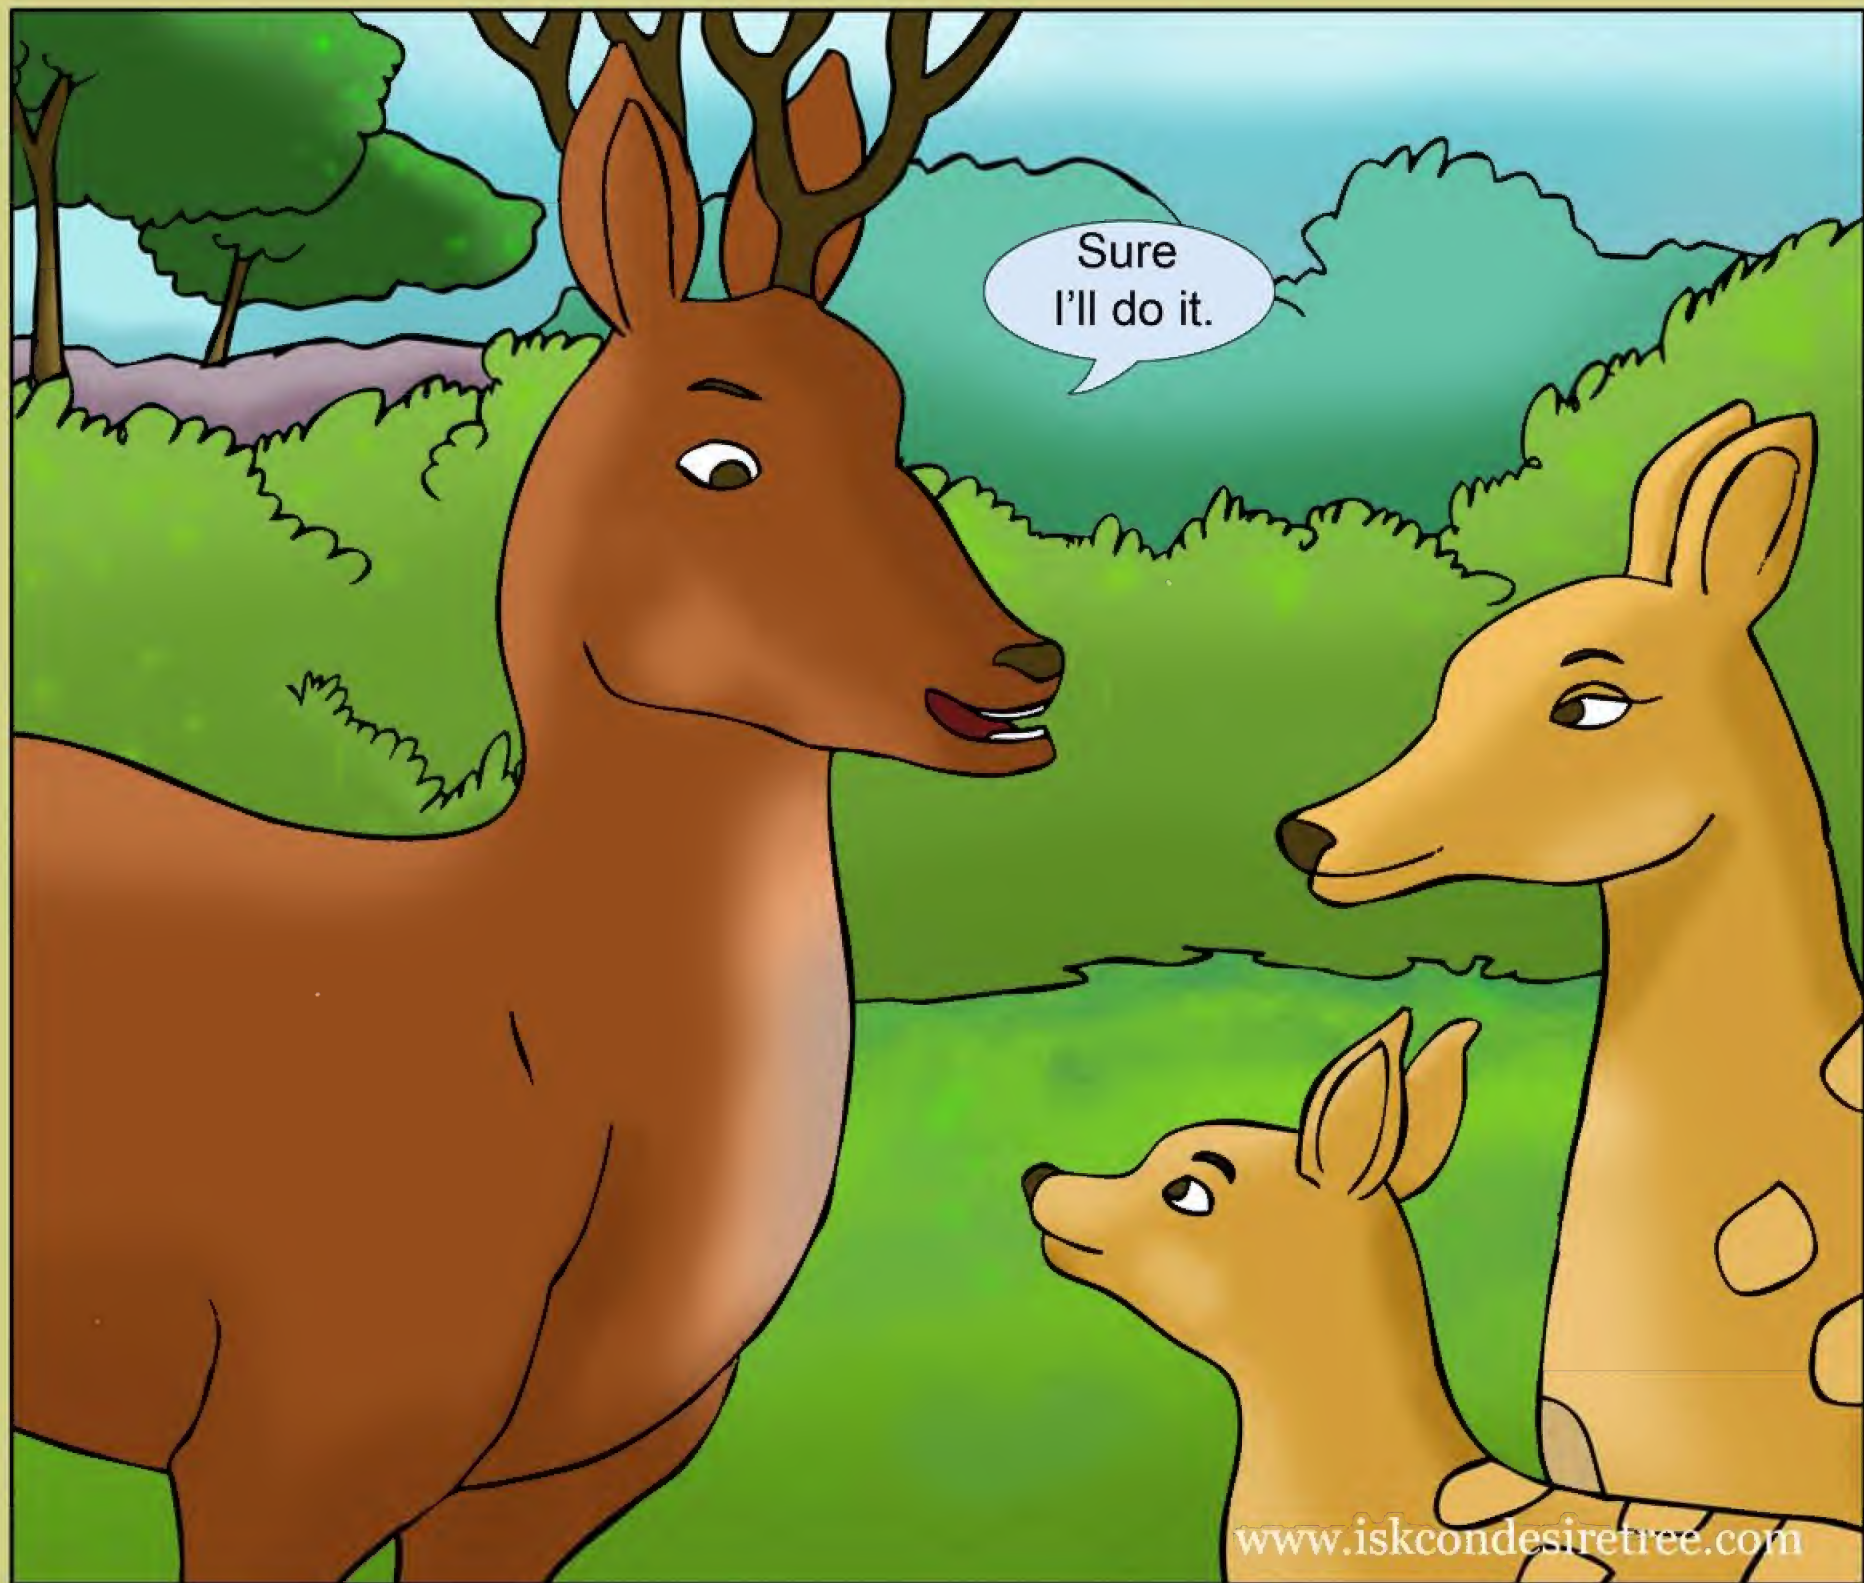

In a forest a dove lived with his mother Harini. The mother was always worried as dove had not learnt the art of protecting oneself.

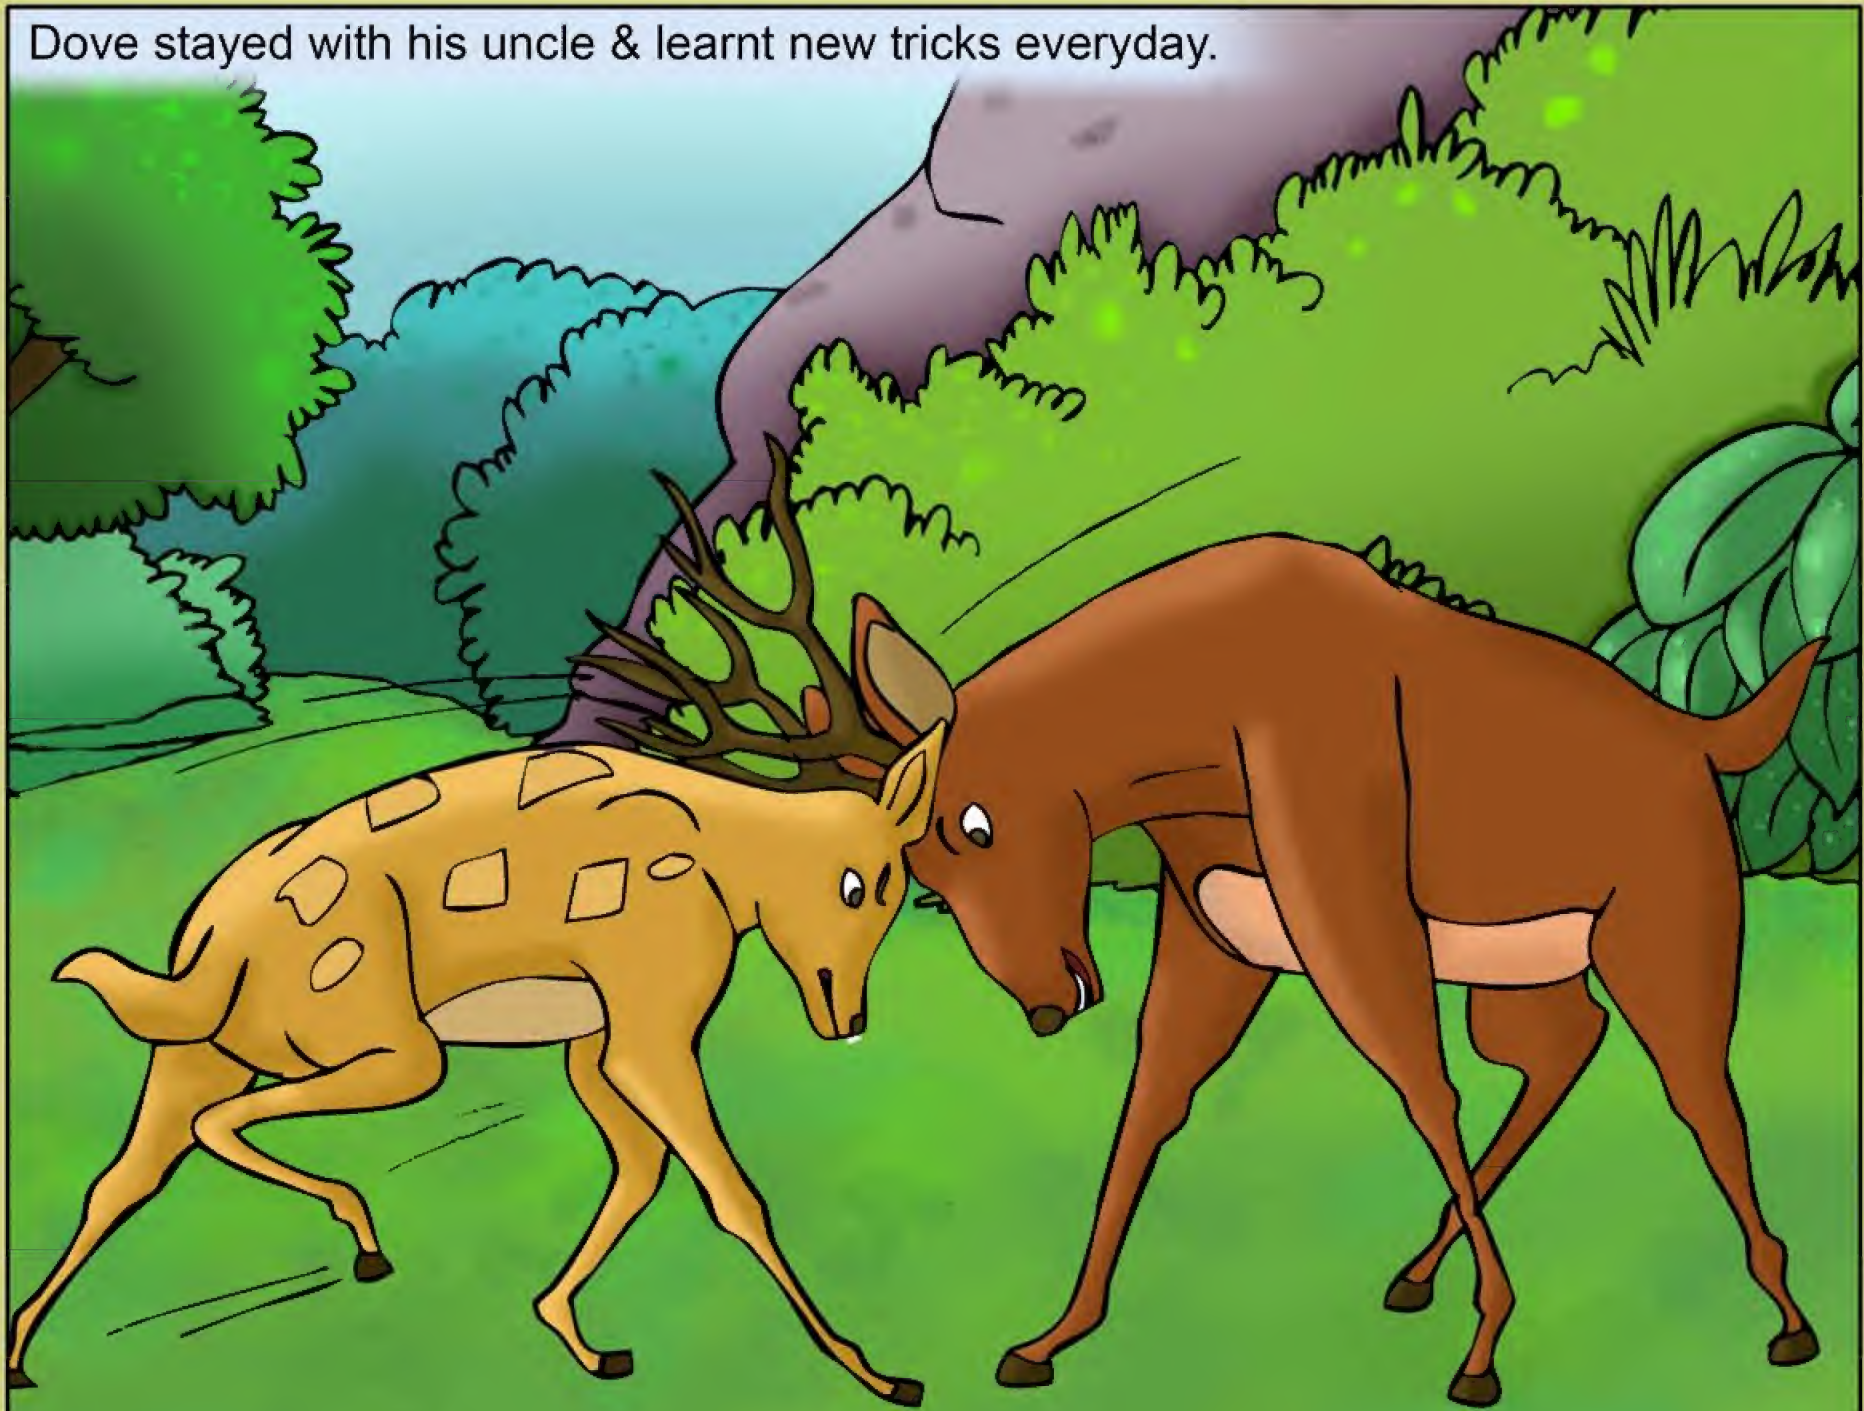

So she took dove to uncle Hariraj.

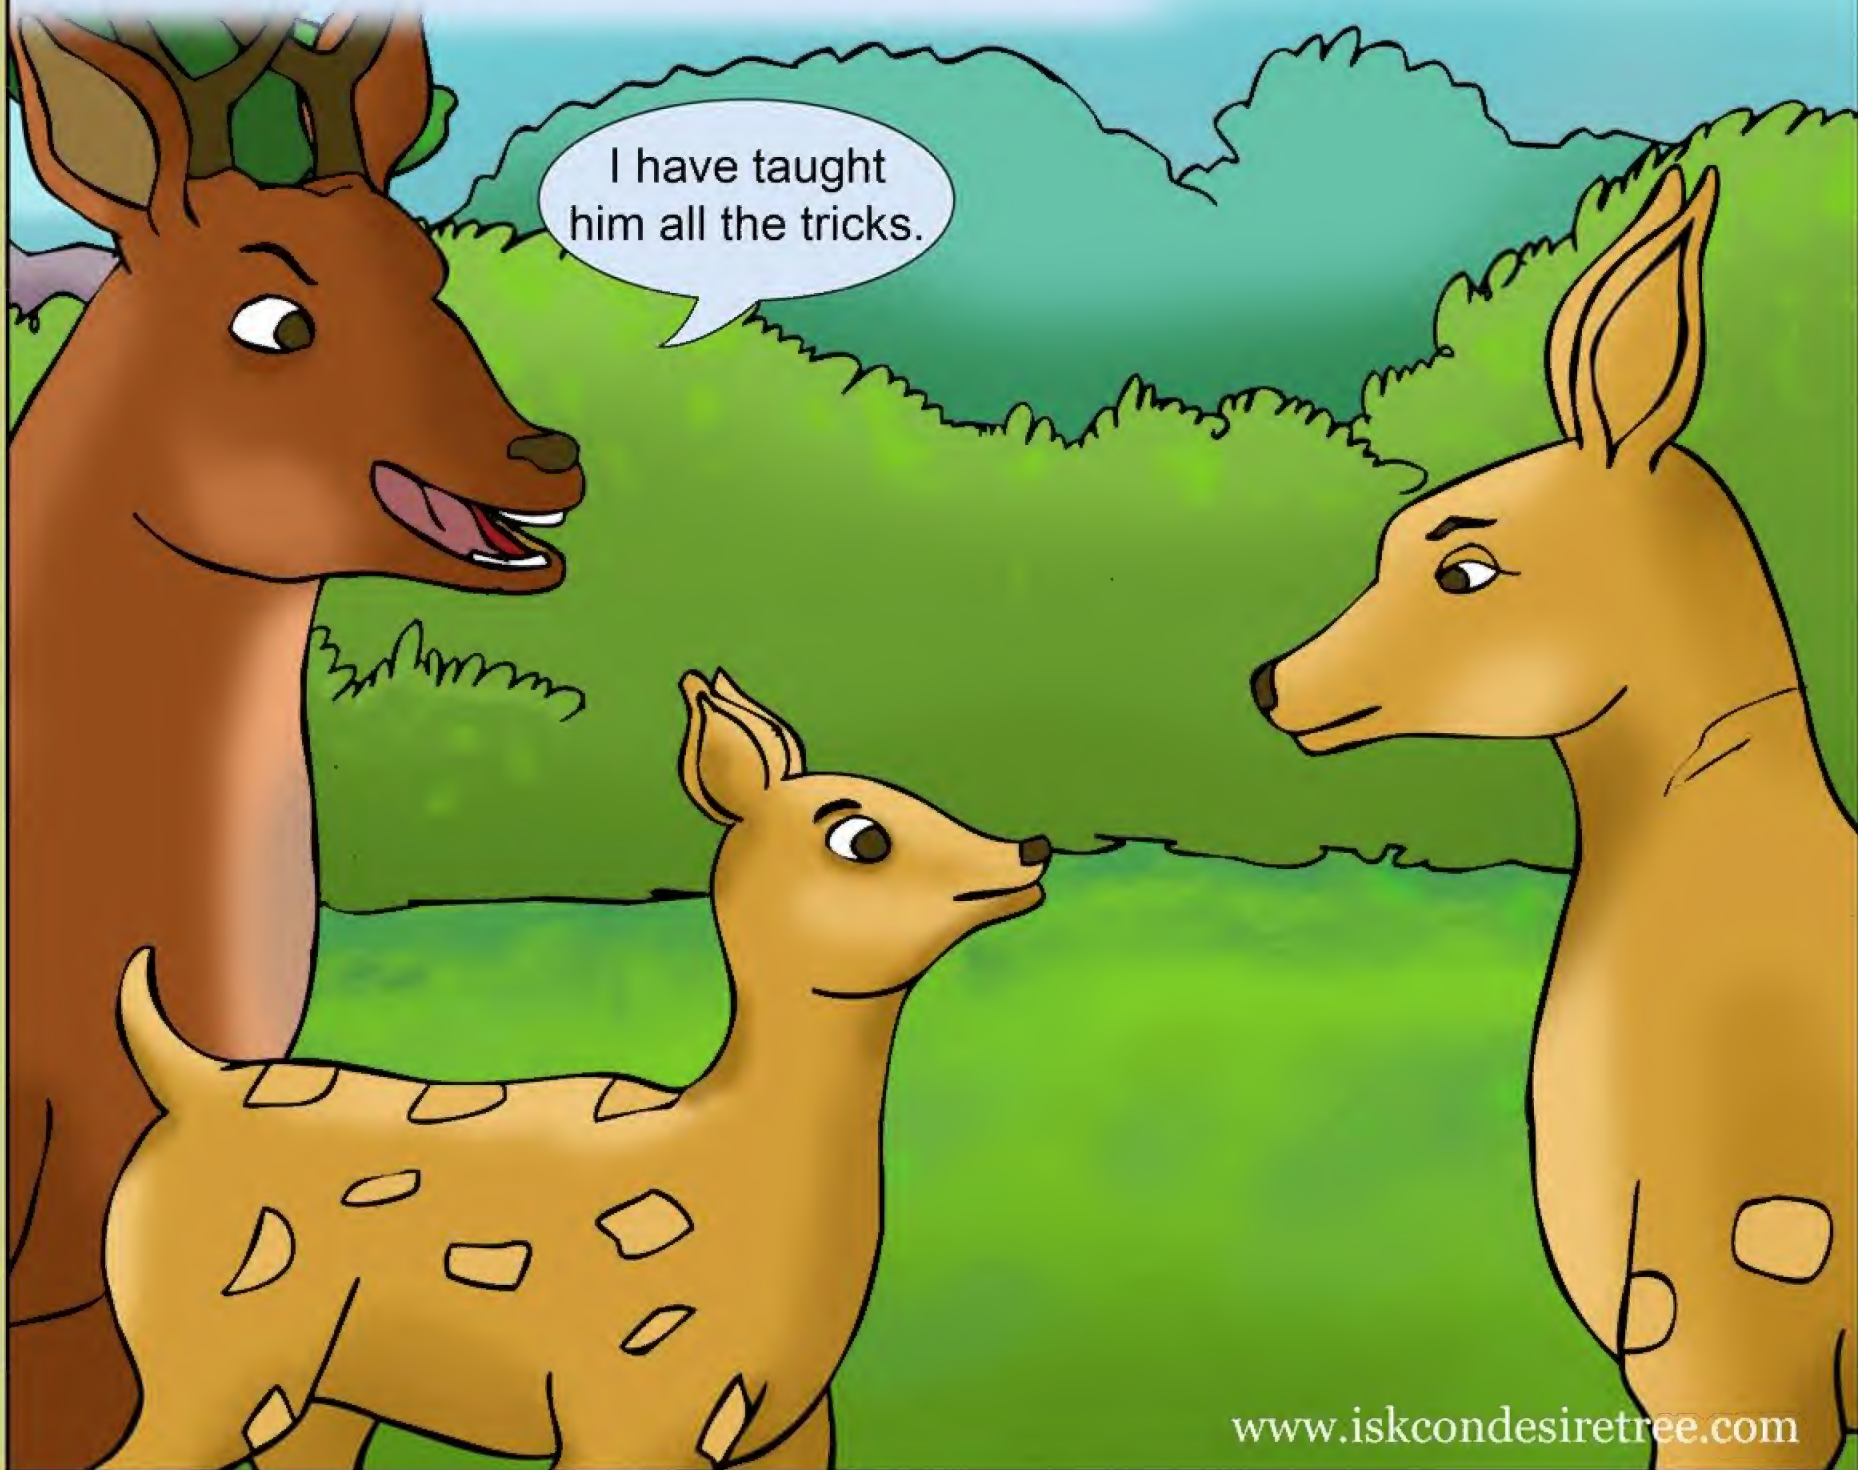

Please teach some tricks for survival from enemies, he is very carelessness so your teaching will help him.

Dove stayed with his uncle & learnt new tricks everyday.

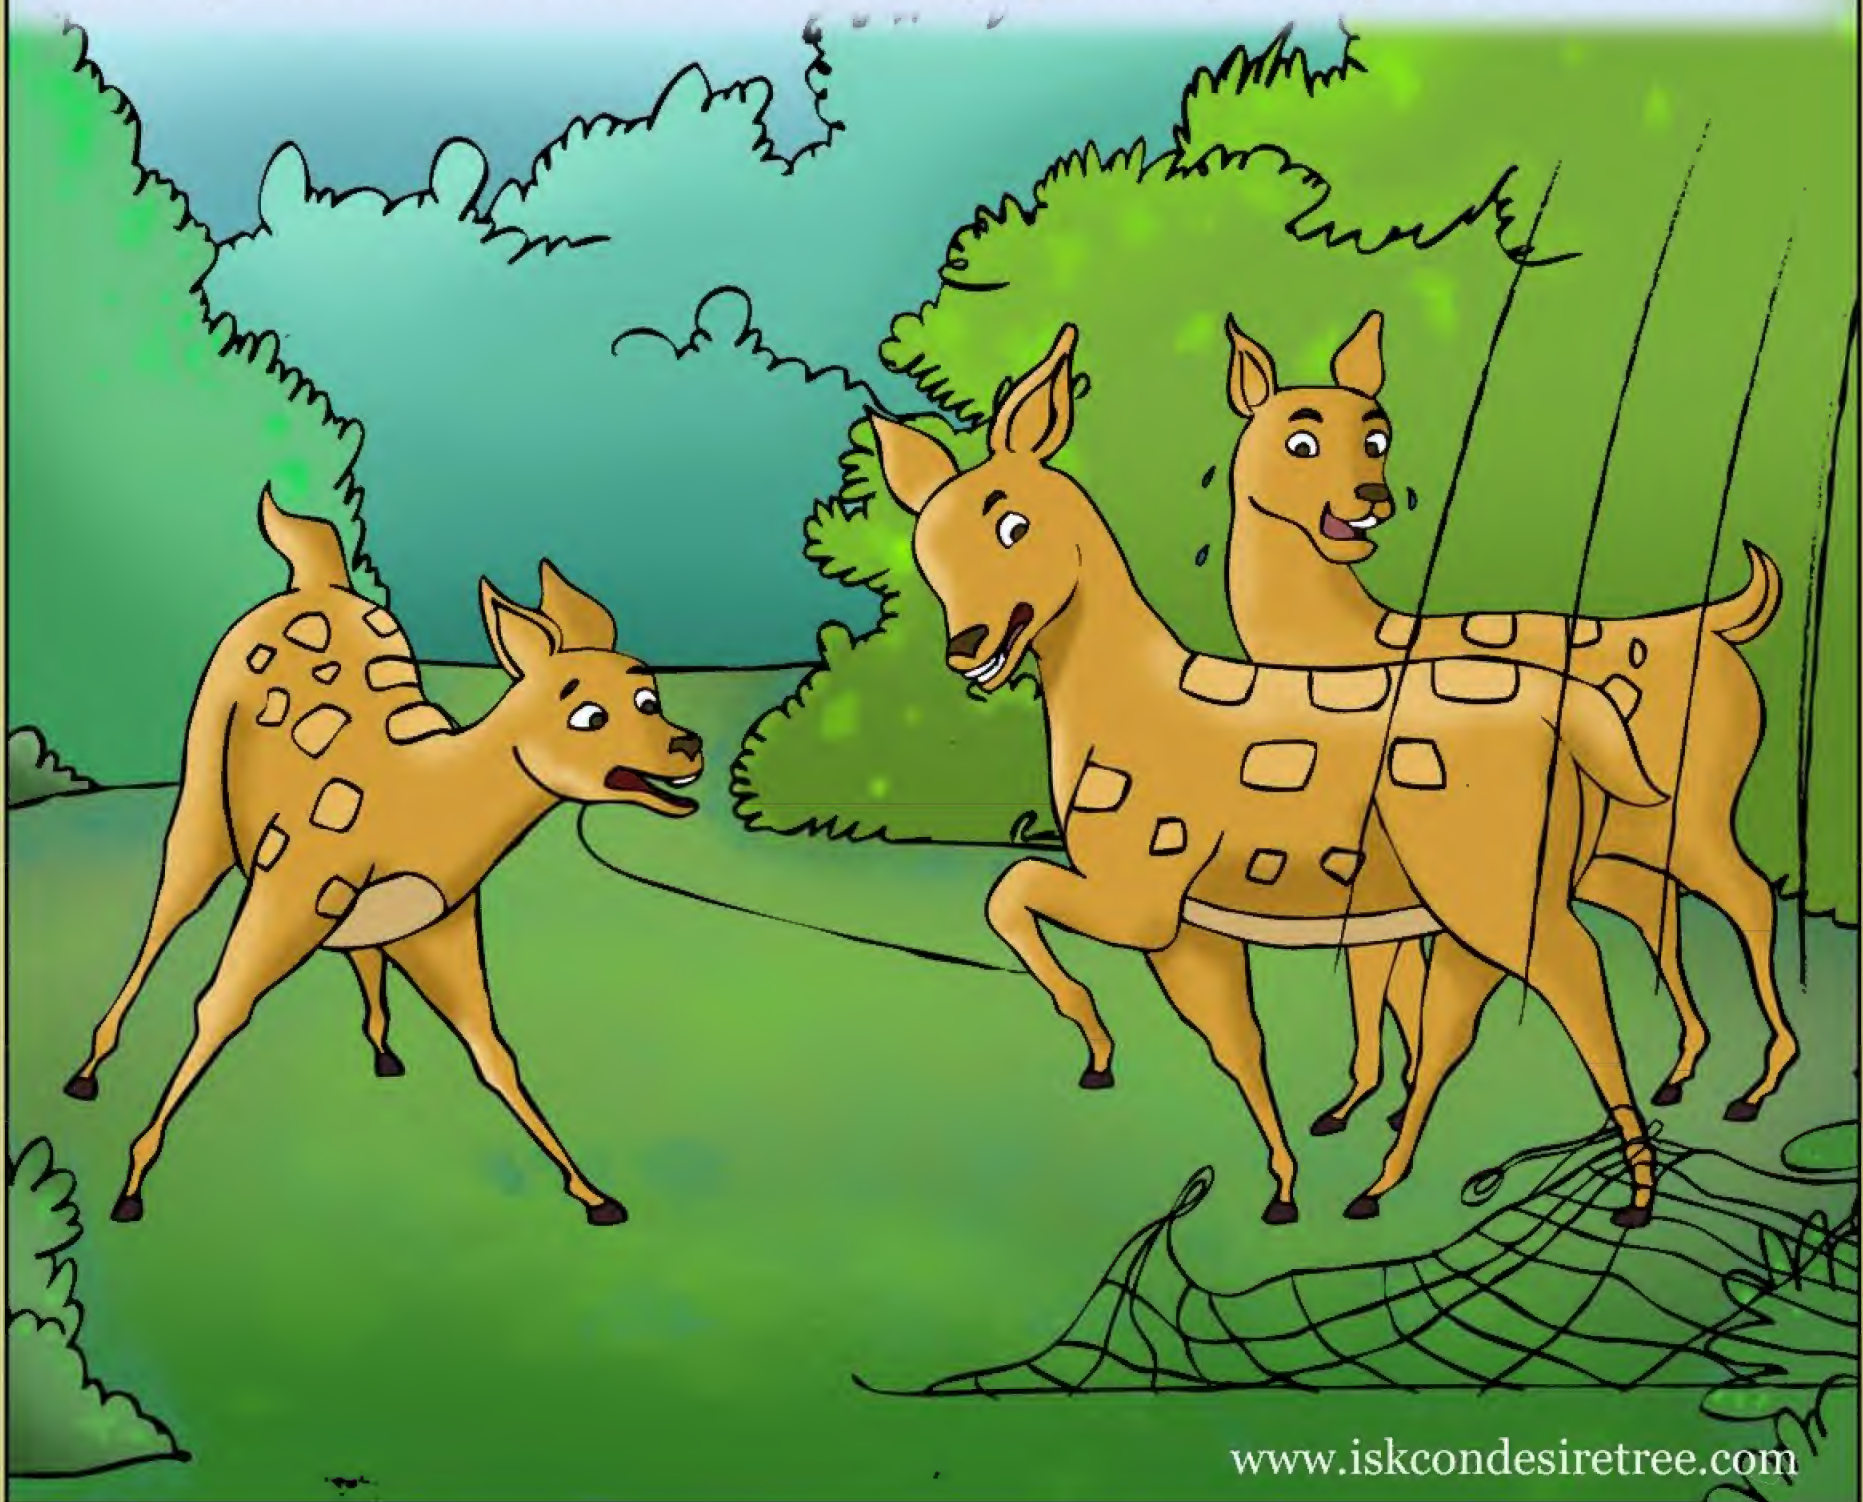

After a month Hariraj took dove back to his mother.

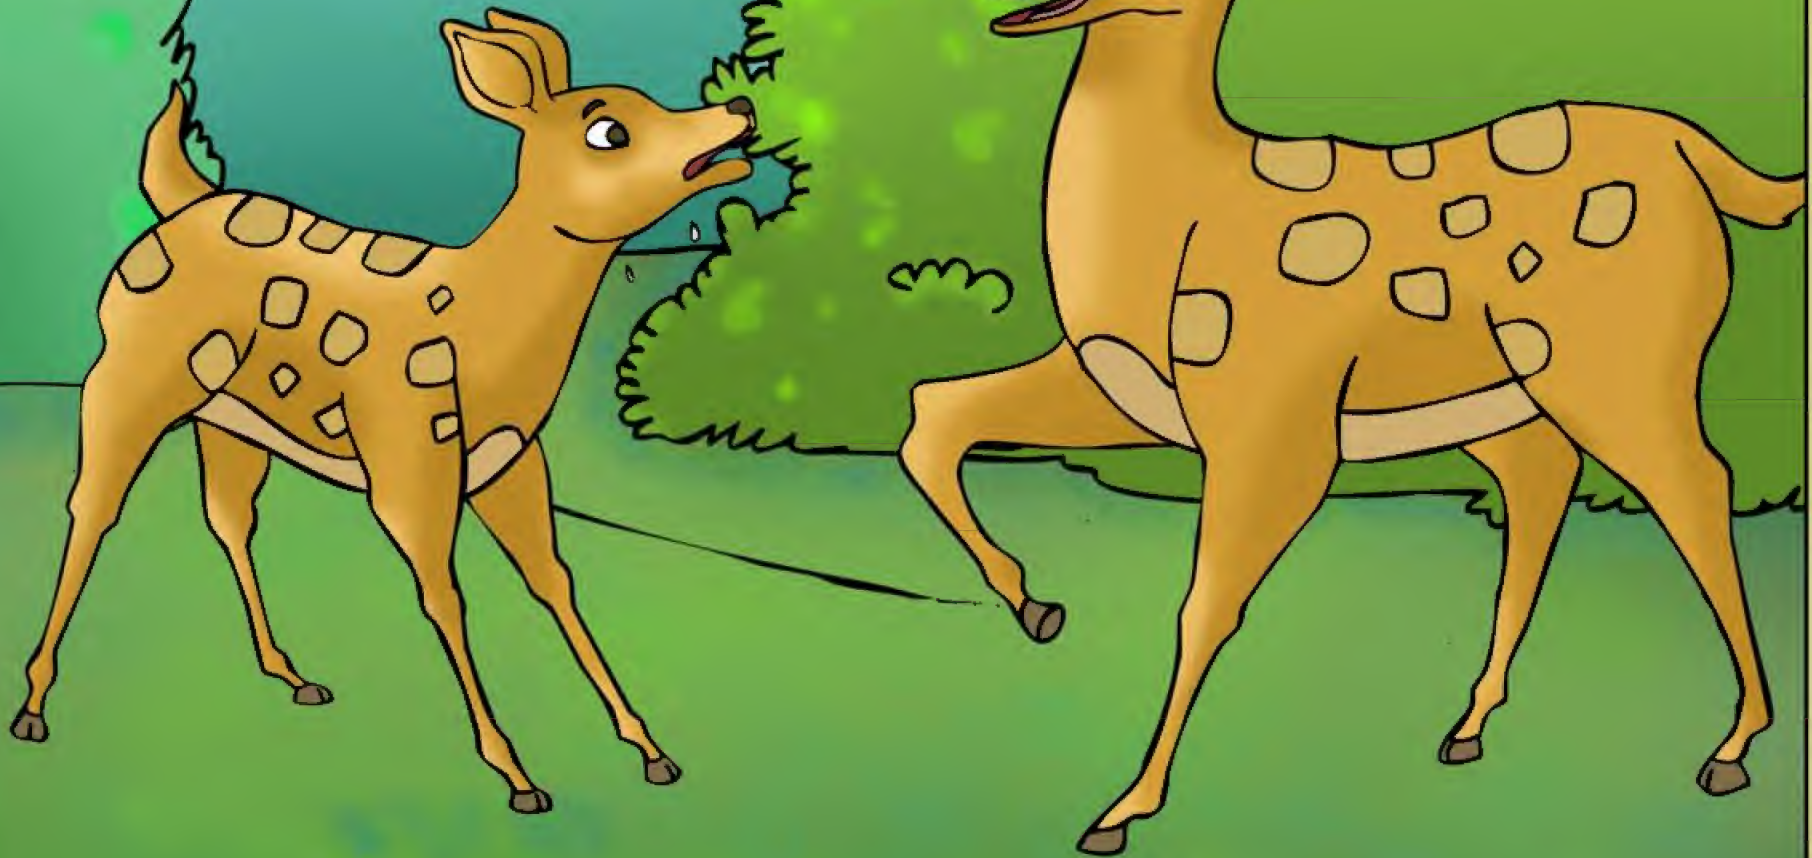

Thanks you.
Now I hope you take
care of yourself.

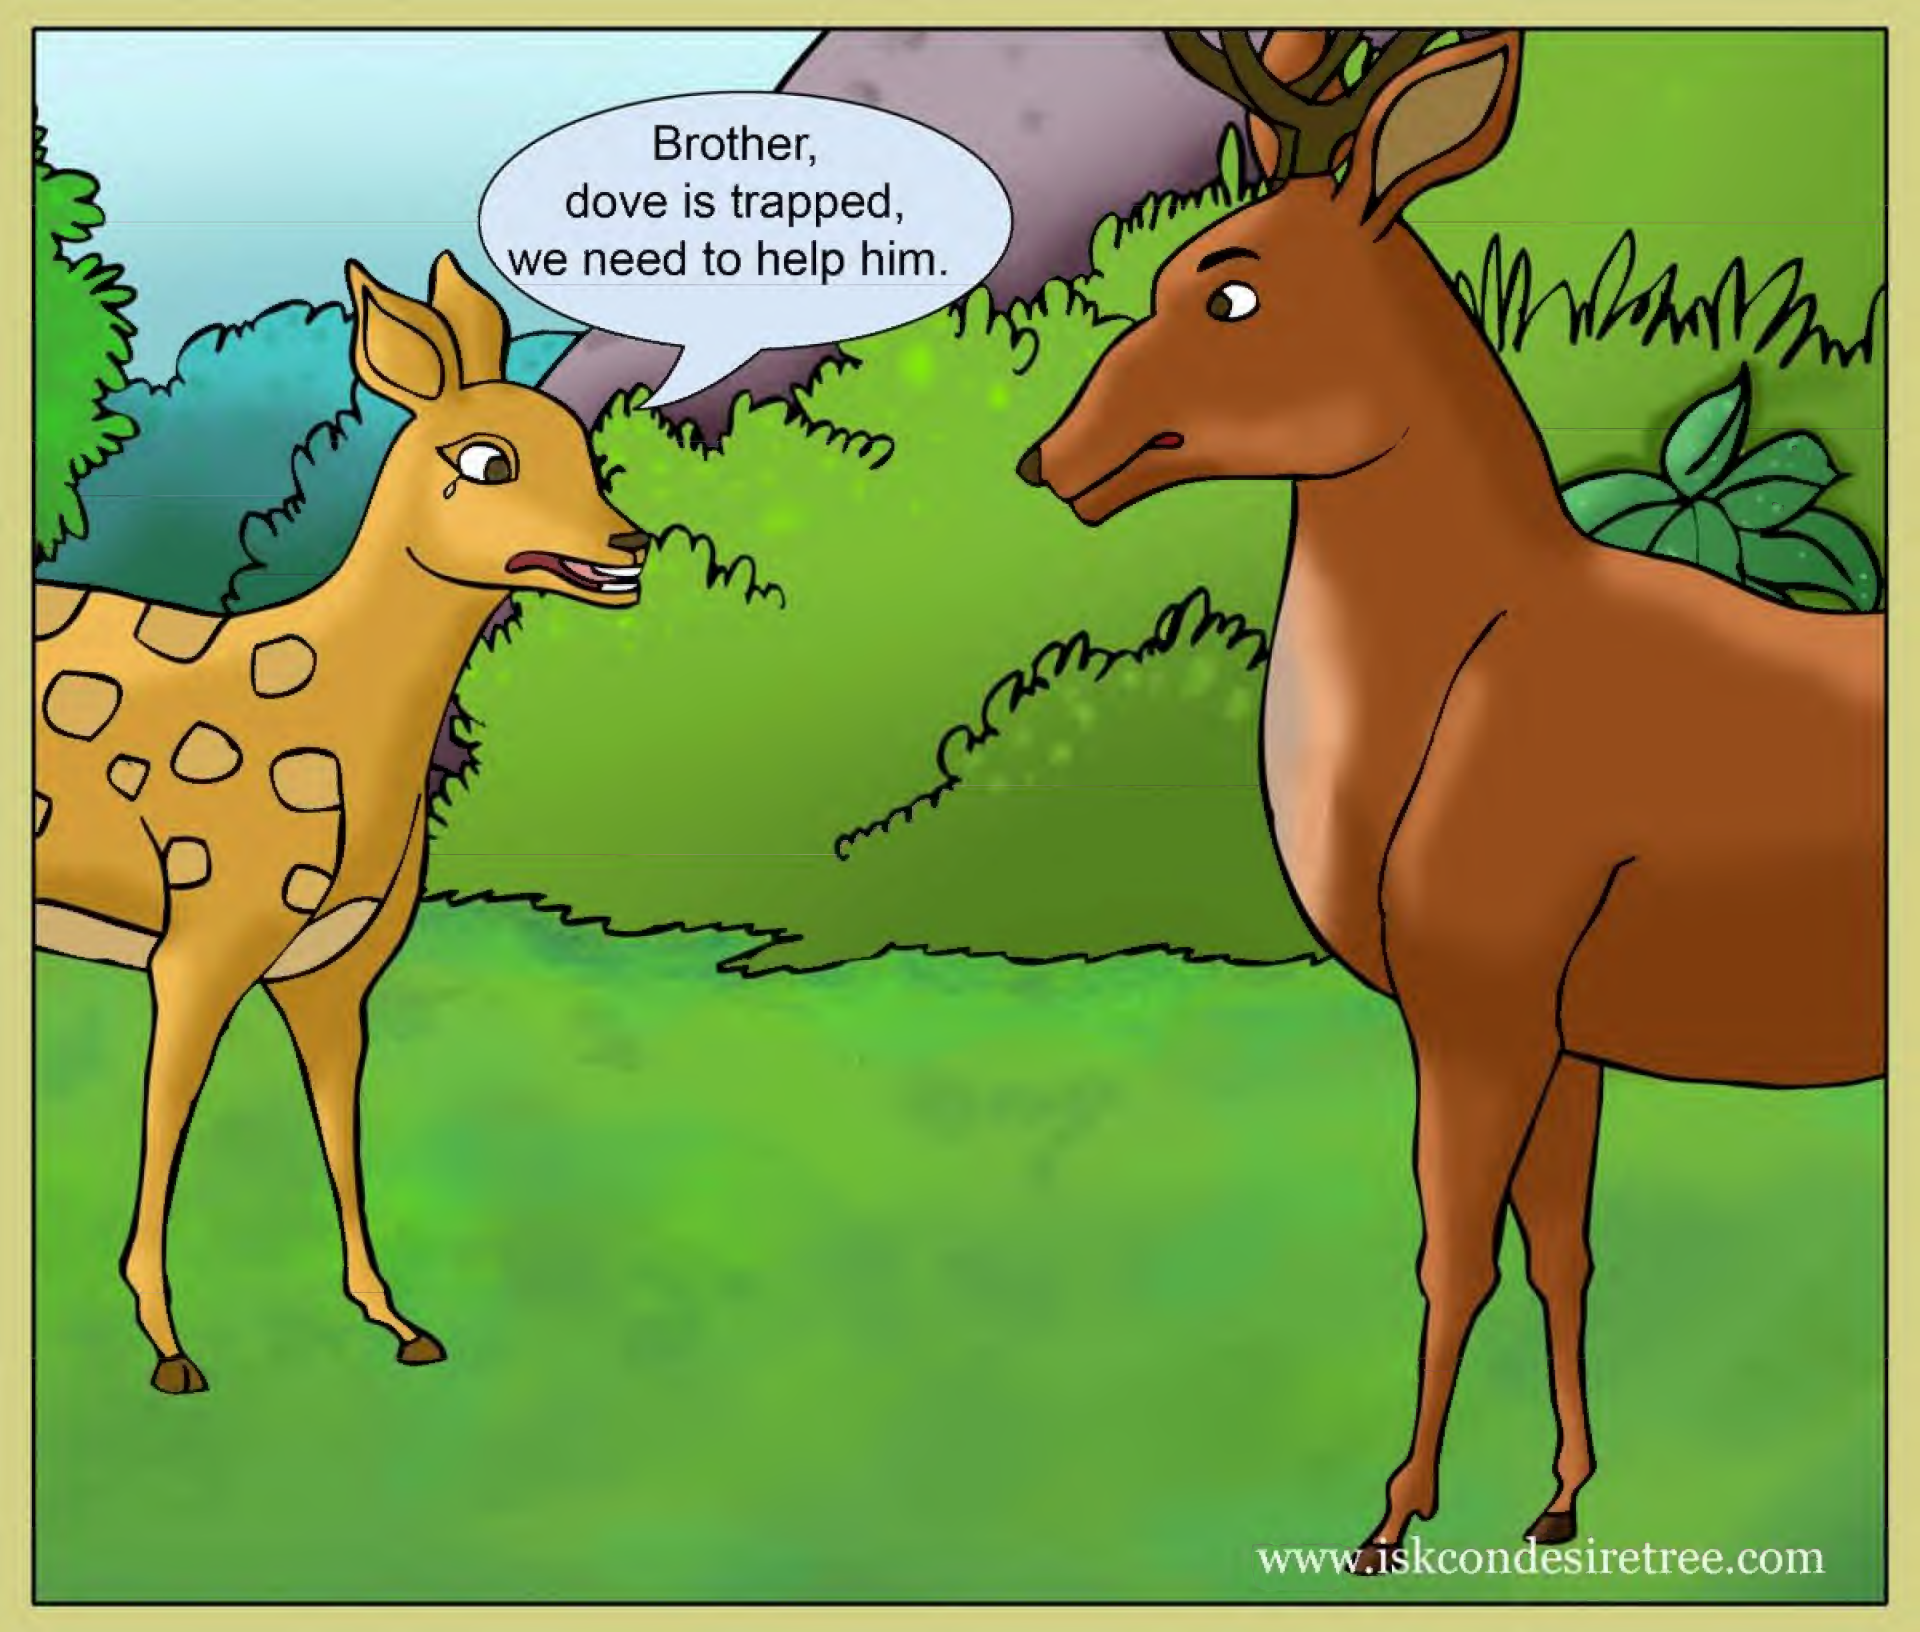

A few days latter dove & his friends were playing. Dove got caught in the hunters trap.

One of his friends come to his mother...

Your son is trapped,
in hunter's net.

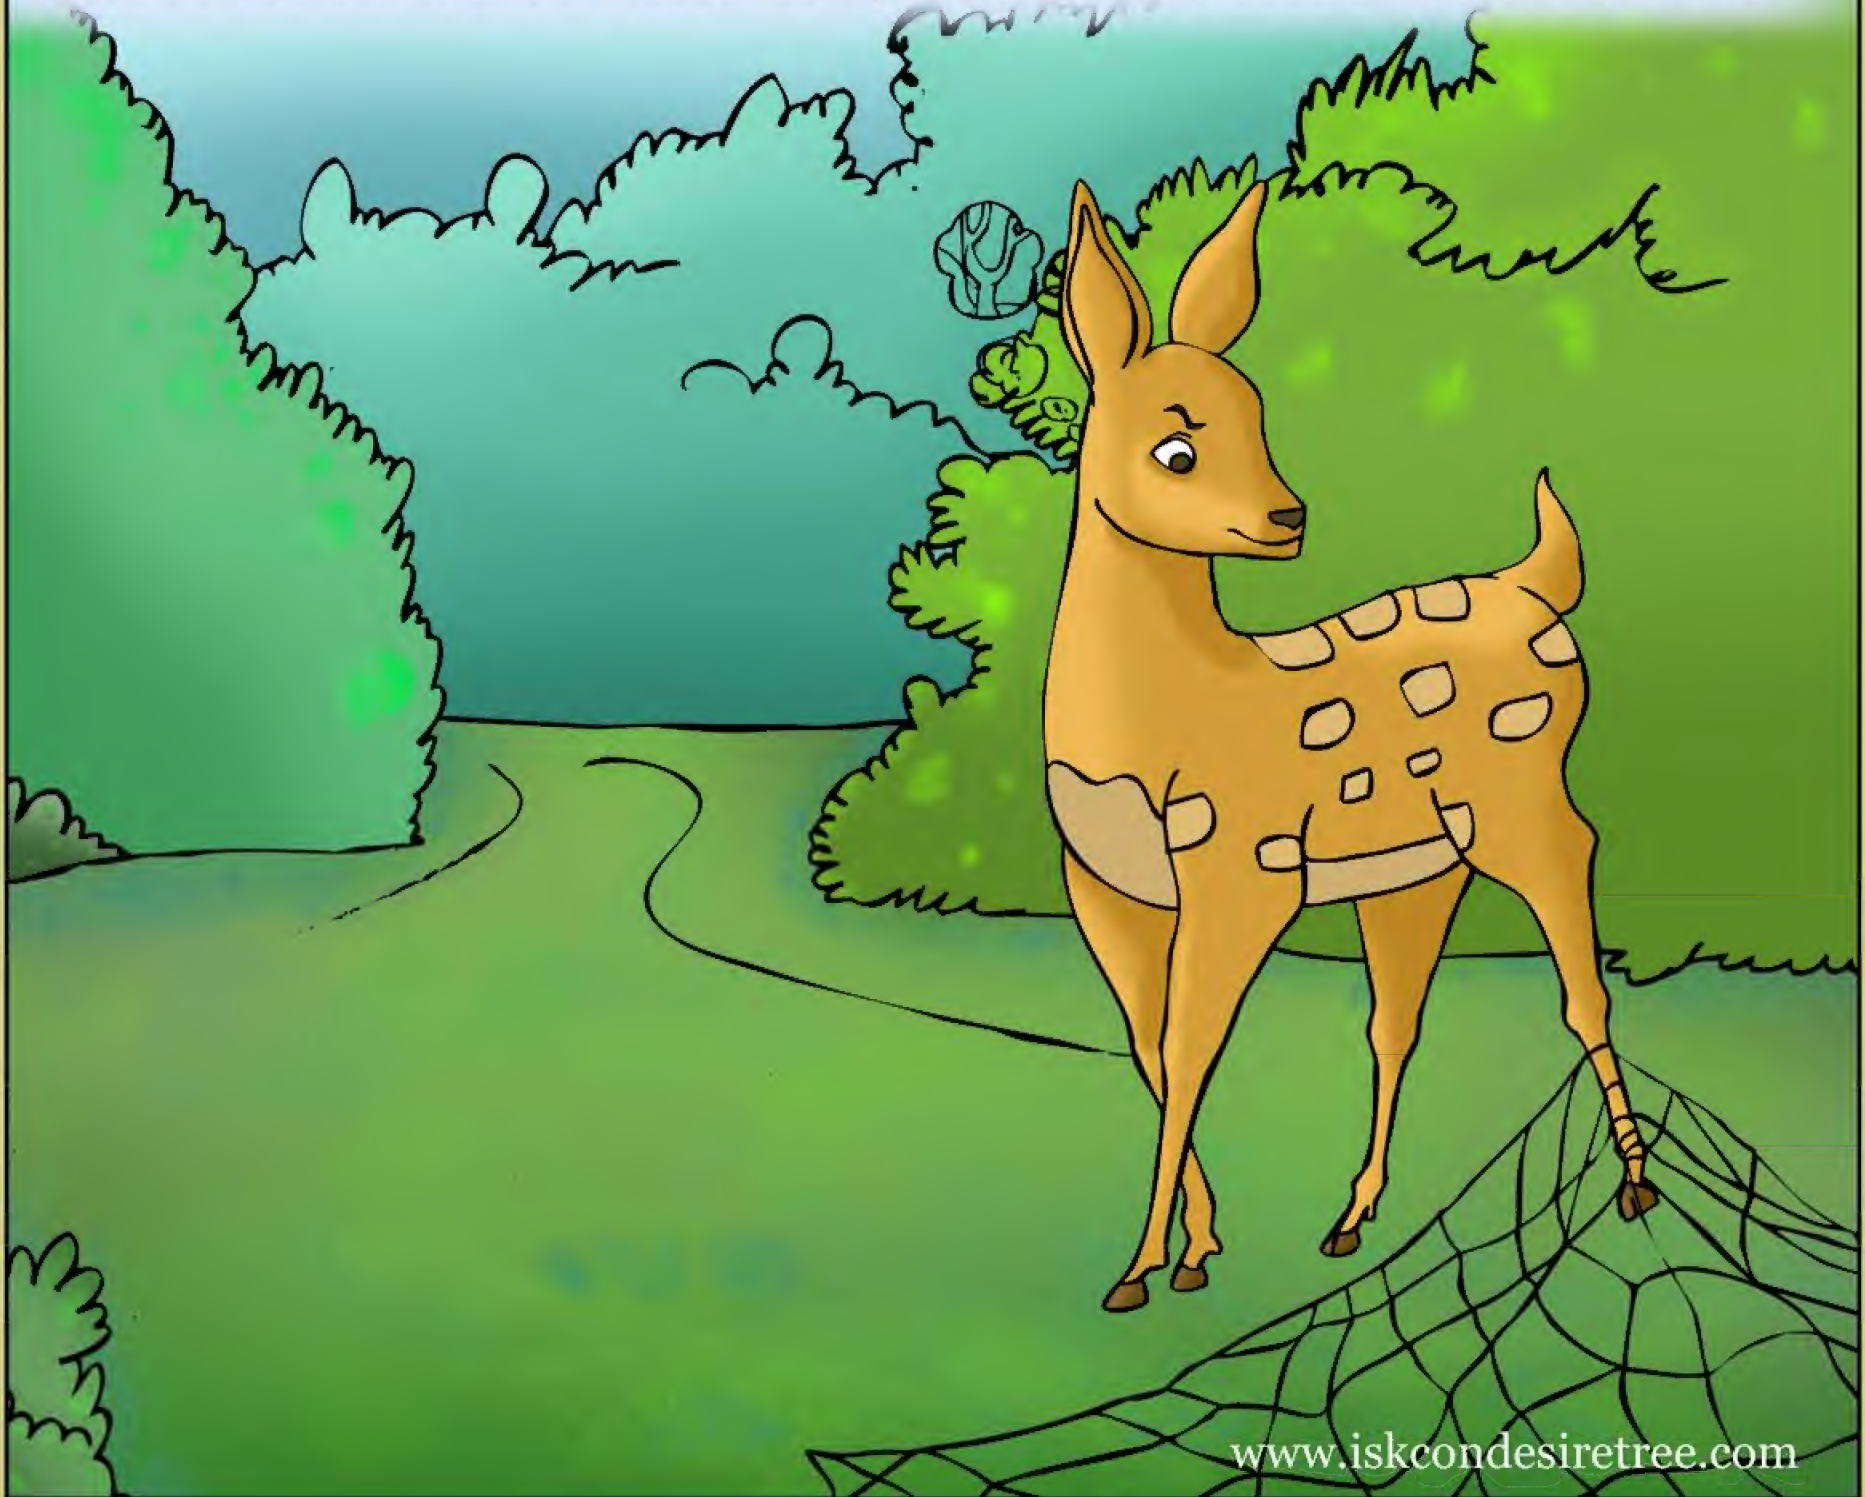

Brother,
dove is trapped,
we need to help him.

Don't worry.
Now is the time
of testing his skills.

He remembered his uncle's lesson to lay still & stiff as a dead animal at such time.

So when dove heard hunter is coming, he lay down and became still & stiff.

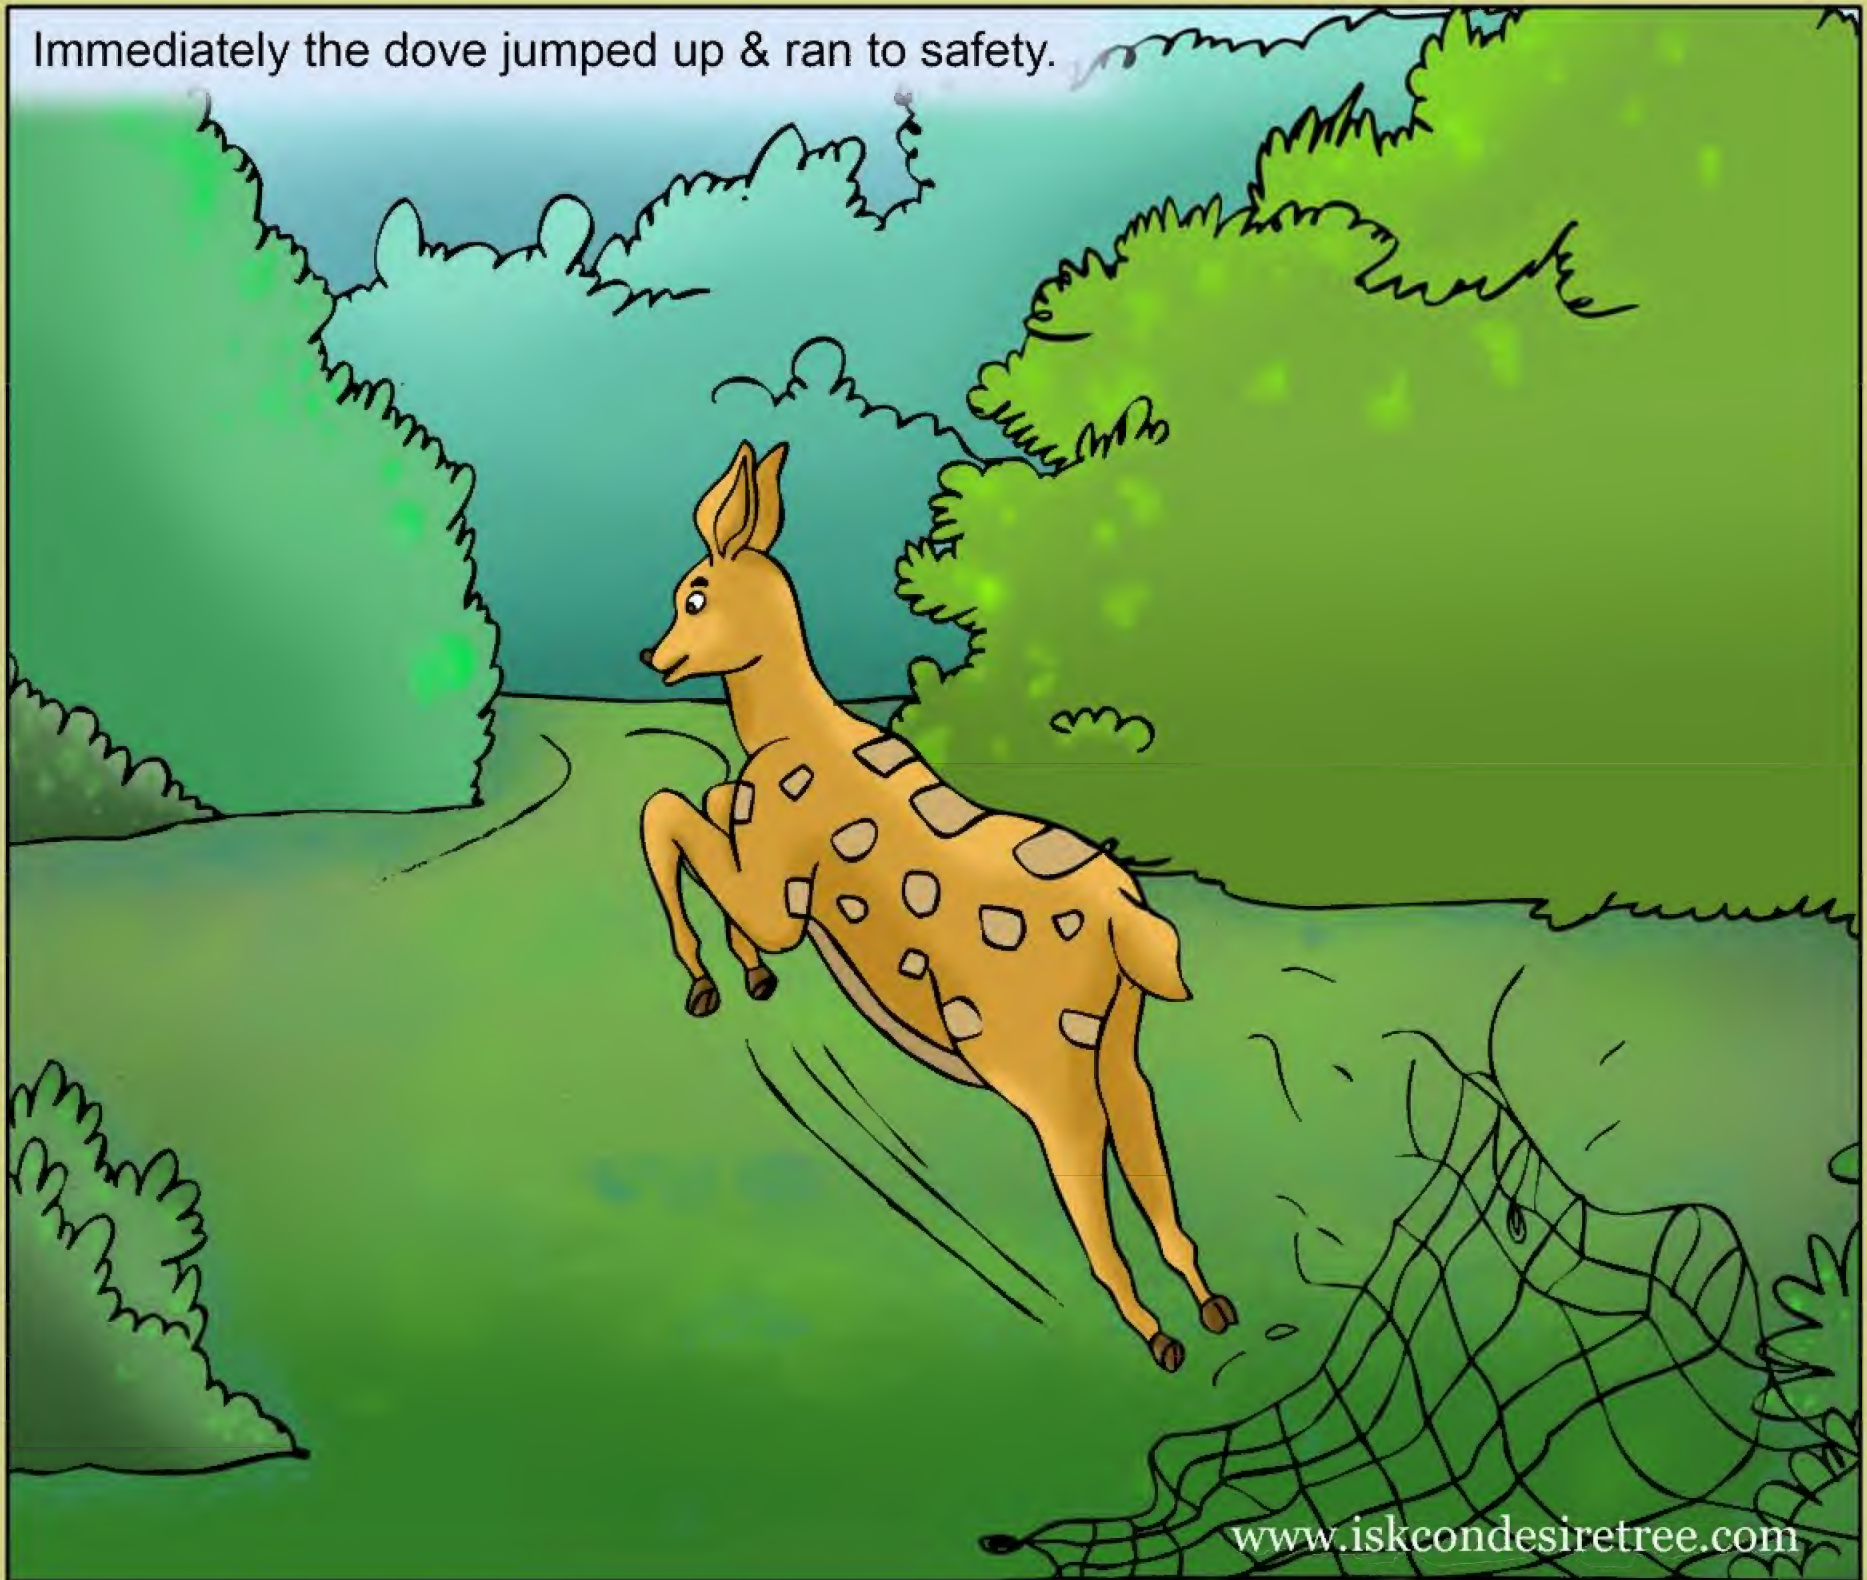

Wow! What a nice healthy dove I have trapped. I should cook it immediately. Let me arrange for firewood.

He remove the net from the dove's leg. The dove was left on the ground and the hunter went to fetch the firewood.

Immediately the dove jumped up & ran to safety.

Harini was proud of the dove that he had used his knowledge to save himself.

Well done.

Moral: Knowing without doing is like ploughing without sowing
